Calibration of the AAPG Geothermal Survey of North America BHT Data Base

Paper #87616

blackwel@smu.edu mrichard@smu.edu

Background:

The AAPG Geothermal Survey of North America (GSNA) was completed in the early 1970's, culminating the production of a massive data base of over 20,000 BHT points from over 10,000 wells in the US, Canada, and Mexico.
From the collated data were publications of continent scale maps by the USGS (Kehle, 1976, DEFord and Kehle, 1976, DEFord and Kehle, 1976, St. 10,760 (St. 17,760 (St. 17,760
