Introductions and Chargef the Graduate Council

Dean Quick opened with introductions of buncil members and welcome to the new member, Tony Petrosino. Dr. Petrosinois representing the Simmons School where he is Associate Dean for Research and Outreach Professor in the Department of Teaching and Learning.

Dean Quickeviewedthe charge of the Graduate Council and described what the committee has accomplished to date

The Council has developed by policies that currently appear in the Graduate Office section of the Graduate Catalog. These policies lay the groundwork for defthis gole and responsibilities of the graduate pedition be able to report

At semesteNevertheless, Dean Quieknphasized that implement a graduate school at SMU and that the e initial policies drafted by the Council represent the first aid the Councils work lastsemester was instrumental to er with the Task Force report, it demonstrated that SMU assary to make the graduate school a success.

chool (Dean Quick)

sks of the Council this year is laying out a plan for the ad the selection of its member his will be delayed pment effort is clear

ved these items for the Council.

currently handle most of these responsibilities. The lack of operational details provided caused concern for whether the office, in its expanded role, would provide an adequate level of service, particularly in time sensitive tasks pean Quick said that, the than providing operational details for the Council's approval, it was part of the Council's role to deliberate and determine operational details. Dean Quick suggested that Council members research how these functions are handled in their schools before the next meeting that operational details could then be fleshed out with Council members' input

Responsible Conduct of Research:

Dean Quick explained that responsible duct of research training for graduate students is overseen by both sides of CRS—graduate studies and research practuse this training is a requirement of the federal agencies that provide research gracus rently, SMU Ph.D. students funded on federal grats attend a oneday (8hour) seminated by the Assistan Dean of Graduate Studies and the Assistan Vice President for Research Integrity and Operation aculty are not involved, but videovignettes from SMU faculty reshown during the semina Master's students funded on federal grants do online CITI training or credit appears on students' transcripts for this training. ORGS has added milestonest can scripts for students who did the training in Spring '19 Dean Quick mentioned that a for redit responsible conduct of research

Assistant Dean Itkiprovideda comparisorof how several schools are providing ponsible conduct of research training. Duke University example only does in person training All Ph.D. students do six hours of training at orientation and three two elective seminars—12 hours total (School of Medicine Ph.D. students do mole ster's students do four hours of training at orientation and one two our elective (six hours total aculty can propose elective courses; departments can also propose to have a course or seminar they already offer carry RCR credit (only up to two hours of RCR credit)

Assistant Dean Itkialso went through responsible conduct of research training programs and requirements at Vanderbilt, Notre Dame, and Northwestern (see slides 17 the accompanying PowerPoint presentation)

Assistant Dean Itkiwent through some key takeaways) SMU is not currently following NIH requirements and recommendations particular on faculty participation, training for scholars at all levels (including postdocs), and in spreading imaginout over multiple sessions; 2) eware behind aspirational peers in only making NSn inded students do the training and in not following the NIH requirements and recommendations; 3) ewdon't have accurate records of sturds who have done training; 4) SMU's current training is "one size fits all students get the same training, regardless of discipline.

Assistant Dean Itkitalked aboutpossible policies and procedures for responsible conduct of research training which the Graduate Council might recommende quiring that all Ph.D. students and postdocs do 8 hours of preson training in their first year; having h.D. students and postdocs do a four-hour core course (led by ORGS) plus two-hour faculty-led electives spread across their first year and requiring master's students on federal grants to do the same cruiting and compensating aculty in different disciplines to develop elective adding the training as a course on students' transcripts. We are creently getting this ontostudents' transcripts as a milestone, but having a class for high students register and receive credit would ensure more accurate records

Postdoctoral Appointments (Introduction by Associate Provost Patty Alvey

This has some gency to it because common anticipated postdoctoral appointment to a Quick stated that the Graduate School Taskforce had recommended that postdocs fall under the common of the graduate school to facilitate ostdoctoral hiring and manage support services for postdocs. There are currently pressing issues, though, concerning whether postdoctoral be allowed to teach, and if so, how much Perhaps "postdoc" is not the right category for some of these positions.

The Counil needs to define a postdoctorposition, with an understanding of what constrainessist if they are to continue being staff position. Dean Quick stated that the Vanderbilt model in
